### Recommendations – online lectures

If you have online lectures, we want to advise you to use wired Internet connection. Due to the construction of the Student dormitory Trsat as well as the features of the WiFi technology, wireless connection can not be considered as a stable Internet connection for video streaming or tasks / projects (online lectures). For that stable (wired) connection is necessary.

In case of using WiFi network connectivity all users of accommodation are connected to one device and they need to share Internet speed. On the other side, in case of using wired connectivity users of accommodation will not have such a problem (connection is stable).

Therefore, it is highly recommended to participate in online classes or access to exams by using wired connection to the Internet.

### Dangers of strong wind / rain

Strong wind and a lot of rain are not uncommon during the winter months in Rijeka. In case of strong wind, please:

- ✓ stay inside the room/building;
- ✓ be careful when using the main doors – strong wind can knock them out from your hands which can cause major material and other damages;
- ✓ move in a bent position, in leeward, holding onto handrails and immovable objects;
- ✓ be careful because the roof tiles, façade, blinds, branches, boards, rocks etc. may fall;
